Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-6,25-28 are rejected under 35 U.S.C. 103 (a) as being unpatentable over Woo (3,957,053) in view of Kimura et al (5,702,352). Woo discloses in figure.5a, an acupuncture needle, including: a solid, substantially straight electro acupuncture needle 11 comprises a shaft, a first end and a second end, where the first end of the needle is exposed, where a portion of the second end of the needle is surrounded by a conductor which is a coiled metal wire (starting from element 20 to a knurled section at best seen in fig. 5a). Woo is silent regarding an insulator covers at least a portion of the shaft.

Kimura discloses such an insulator (element 7) covers at least a portion of the shaft.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify Woo by making the insulator covers at least a portion of the shaft. as taught by Kimura to allow convenient for the user to hold the device and can enhance the effect of the device. Note that col. 5, lines 14-15 of Kimura teaches the insulator comprises a biocompatible coating which is selected from the group consisting of polyurethane.

Response to Arguments

Art Unit: 3734

2. Applicant's arguments filed 7/2/2007 have been considered but are moot in view of new ground(s) of rejections. Applicant is asked to please refer to the modified prior art rejections above where examiner addresses applicant's concerns regarding prior art rejection.

Conclusion

3. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
